

Simon Chang

Riverside, California | chang88simon@gmail.com | [Portfolio](#) | [LinkedIn](#)

Education

California State University Northridge

Northridge, CA

Bachelor of Science in Computer Science

May 2025

Riverside City College

Riverside, CA

Associate of Science in Math and Science, Associate of Arts in Social and Behavioral Studies

Jun 2022

Technical Skills

Certificate: AWS Cloud Technical Essentials, Maven Analytics

Languages: Python, Javascript, Typescript, C#, SQL, JQL, HTML, CSS

Technologies: React.js, Node.js, Next.js, AWS, MySQL, PyTorch, TensorFlow, Pandas, Git, Docker

Tools: Tableau, Git, SQL Server, MySQL, AWS

Concepts: Frontend, Data Analyst, Machine Learning, Data Engineer, Software Engineering, Backend

Selected Projects

Food Rater (in progress) | *React Native, Typescript, Expo, Convex*

July 2026

- Developing a cross-platform mobile app using **React Native** and Expo for individual item rating
- Utilized **Convex BaaS** to manage cloud functions and **end to end** type safety, streamlining data flow between the frontend **API** layer and the database
- Structured complex restaurant, menu, and review relationships via **type safe** queries to ensure data integrity
- Built a responsive **UI** using NativeWind and modular, component based frontend architecture

Business Intelligence Dashboard | *Tableau, Data Analyst*

Mar 2026

- Translated analytical findings into visual insights for non technical users
- Performed **data cleaning and preprocessing** on datasets using **blending, joins, and LOD expressions**
- Conducted **exploratory data analysis** to identify trends and patterns
- Developed **interactive dashboards** to track KPIs and support data driven decision making

Hackathon Schema | *SQL Server*

Apr 2025

- Designed a **normalized relational database schema** with ER diagrams
- Wrote complex **SQL queries, joins, and aggregations** to generate insights
- Developed **stored procedures and CTEs** for real time leaderboard calculations
- Improved query efficiency through **database optimization techniques**

Next Note Generation | *Python, TensorFlow, Scikit-learn, Pandas*

Nov 2024

- Trained sequence models using LSTM networks and **agent frameworks** to orchestrate text generation workflows
- Preprocessed text datasets through tokenization and embedding **training** to optimize input data pipelines
- Established rigorous **evaluations** to benchmark model precision, loss, and latency metrics across training iterations
- Documented a technical **runbook** detailing localized **LLM deployments** and environment fallback configurations

Grocery Store Database | *MySQL*

Oct 2024

- Built a structured database system for retail operations
- Automated workflows using **triggers and stored procedures**
- Improved query performance by implementing **indexing strategies**
- Ensured **data integrity and validation** across transactional systems

Work Experience

Listen2MeABA

Rialto, CA

Behavior Technician

Oct 2025 - Mar 2026

- Collected and recorded **behavioral data** using Portia Pro to support insurance reporting and compliance requirements
- Maintained structured datasets to track client progress over time, ensuring **data consistency and integrity**

CSUSB

Remote

STEM Research Intern

Jun 2021 - Jul 2021

- Collaborated in team based research and analytical problem solving
- Communicated technical concepts clearly to peers
- Used overleaf for **data collection**
