

Simon Chang

Riverside, California | chang88simon@gmail.com | [Portfolio](#)

Data Analyst with experience using Python, SQL, and Tableau to transform raw data into insights for decision making. Experienced in building end-to-end analytical workflows, from data cleaning and modeling to dashboard development and KPI tracking. Strong focus on identifying trends and delivering data-driven recommendations.

Education

California State University Northridge - B.S Computer Science

Riverside City College - A.S Math and Science, A.A Social and Behavioral Studies

Technical Skills

Certificate: AWS Cloud Technical Essentials, Maven Analytics (Data Analysis Track)

Languages: Python (Pandas, NumPy), SQL, JQL

Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Statistical Analysis

Tools: Tableau, SQL Server, MySQL, AWS

Concepts: ETL Pipelines, Data Modeling, KPI Tracking, Dashboard Development

Other: GitHub, Jira

Projects

Business Intelligence Dashboard - Tableau

Spring 2026

- Translated analytical findings into visual insights for non technical users
- Performed **data cleaning and preprocessing** on datasets
- Conducted **exploratory data analysis** to identify trends and patterns
- Developed **interactive dashboards** to track KPIs and support data-driven decision making
- Implemented **data blending, joins, and LOD expressions** to enhance analytical depth

Portfolio - React, HTML, Tailwind, Vite

Fall 2025

- Developed a responsive portfolio showcasing technical and data projects
- Applied **component-based architecture and reusable design patterns**
- Optimized performance using responsive design and modern frontend practices

Mock Hackathon Schema - SQL Server

Spring 2025

- Designed a **normalized relational database schema** with ER diagrams
- Wrote complex **SQL queries, joins, and aggregations** to generate insights
- Developed **stored procedures and CTEs** for real-time leaderboard calculations
- Improved query efficiency through **database optimization techniques**

Next Note Generation : Python

Fall 2024

- Built a machine learning model using **LSTM neural networks**
- Preprocessed datasets through **tokenization and data transformation**
- Tuned hyperparameters to reduce loss and improve prediction accuracy
- Evaluated model performance using **statistical metrics**

Grocery Store Database - MySQL

Fall 2024

- Built a structured database system for retail operations
- Automated workflows using **triggers and stored procedures**
- Improved query performance by implementing **indexing strategies**
- Ensured **data integrity and validation** across transactional systems

Work Experience

Listen2MeABA: Behavior Technician

Oct 2025 - Mar 2026

- Collected and recorded **behavioral data** using Portia Pro to support insurance reporting and compliance requirements
- Maintained structured datasets to track client progress over time, ensuring **data consistency and integrity**
- Analyzed behavioral trends and documented observations to support data-driven treatment decisions

CSUSB Mentored Summer STEM Research

June 2021 - July 2021

- Collaborated in team based research and analytical problem solving
- Communicated technical concepts clearly to peers
- Used overleaf for **data collection**
